

Environmental Policy

Al-Abid recognizes the global trend and need to take into consideration the effects that manufacturing is currently having on the environment.

The environmental policy at Al-Abid is to manufacture in the most environmentally friendly way possible so as to reduce negative effects on the environment and ensure customer's appreciation and recognition for their safety in our efforts.

1. Endeavor to establish and maintain environmental management system and practices in accordance with the documented procedures and International Standards.
2. To try and create awareness and training for the employees, so that they will be able to conduct their activities in an environmentally responsible manner.
3. To ensure environmental audits will be conducted to monitor and measure the environmental goals.
4. To promote energy conservation practices within the company.
5. To try and reduce waste and re-use recycled waste where possible.
6. To monitor and control the use of hazardous materials, air emissions and wastewater discharges where possible.
7. To try and develop and provide products that has no unnecessary negative environmental impacts.
8. To encourage our mills and facilities to comply with the existing environmental legislation, laws and regulations of our country.
9. To support the idea of continuous improvement and ensuring that this environmental policy and its objectives will be made available to any interested party upon request.
